IC MASTER *CD-ROM PLUS*

1994
IC MASTER
CD-ROM PLUS™
ROMWARE
COMPACT DISC DATA STORAGE
9660
Includes the complete 1994 IC Master *plus* the 1994 Directory of IC Data Pages *plus* the enhanced 1994 Alternate Source Directory *plus* a powerful inquiry generation and tracking system.
©1994 Hearst Business Communications, Inc. All Rights Reserved.
Considerable effort has been made to ensure the accuracy of the information presented herein. The Publisher assumes no responsibility for inaccuracies, omissions, manufacturers' claims or representations.
No portion of this CD-ROM may be reproduced in any manner without the written consent of the publisher.
MANUFACTURED IN USA BY NIMBUS

3 reference sources on a single compact disk! **CD-ROM PLUS** is fast, easy to use and very user friendly. It combines all of the Master Selection Guides and all of the Indexes from the printed IC Master with hundreds of additional manufacturers data sheets. **CD-ROM PLUS** also includes the entire Directory of IC Manufacturers' Data Pages plus a powerful Inquiry Generation and Tracking System.

- **You can find the exact IC you need in seconds...**
- **Compare specs on your screen...**
- **Print the search results directly to your computer or printer!**

PLUS...

- **You can access over 1,100 manufacturer's data sheets and send them to your laser printer.**

Published annually in the Spring

CD-ROM PLUS runs on any ISO9660 CD-ROM reader and any IBM AT or better PC (or 100% compatible).

No complex software involved. Start your reader and play CD-ROM PLUS. Once you experience the simplicity and speed of CD-ROM PLUS, you'll never work without it again!

JOIN THE CD-ROM BANDWAGON.

For all the details on how to order your IC Master CD-ROM PLUS, call or write:

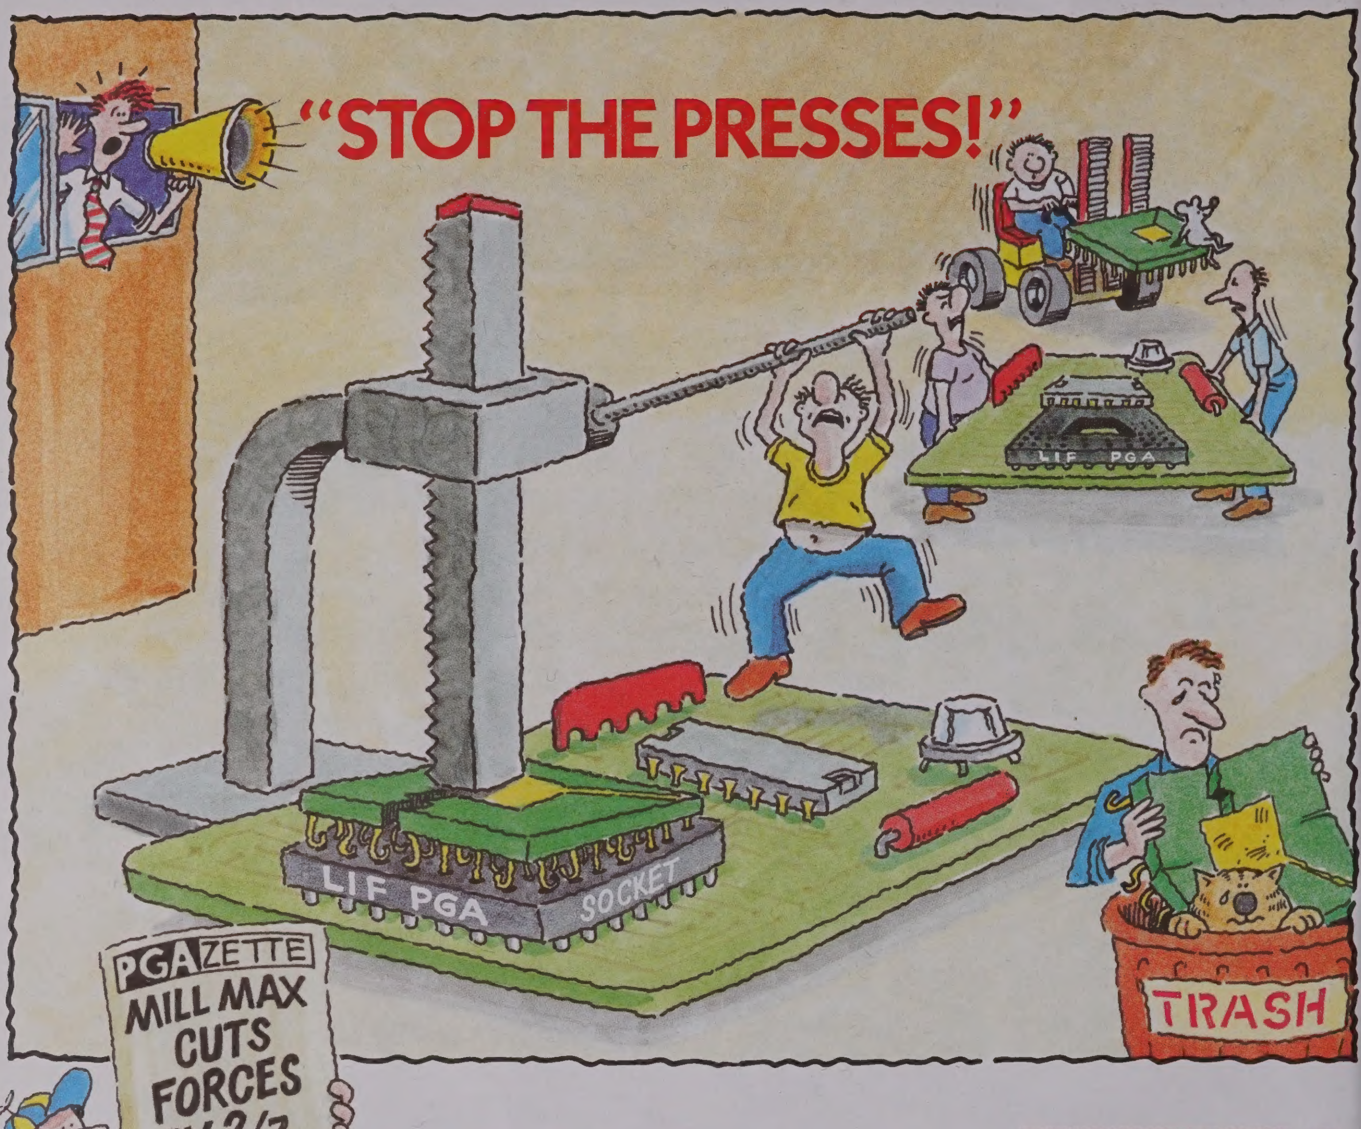
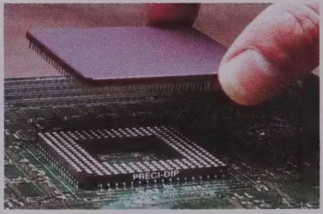
1994
IC MASTER
CD-ROM PLUS



Throw away your arbor presses and insertion tools, because there's a new PGA socket that lets you insert big devices by hand. It's the Preci-Dip® brand "Ultra Lite" PGA socket from Mill-Max,® now available from **Nu Horizons**.

"Ultra Lite" cuts insertion force by 2/3 and extraction force by 1/2, compared to industry standard LIF sockets. Yet it retains the proven reliability that a machined pin socket is famous for. "Ultra Lite" sockets feature a **brand new** 6-finger beryllium copper contact with a "closed funnel" design, as well as a 30% larger contact entry. This combination alleviates the high insertion forces created by bent and misaligned PGA pins. The "Ultra Lite" also offers a lower profile, uses less board real estate, and costs less than either stamped or ZIF sockets.



The Ultra Lite PGA socket permits large devices such as RISC Processors and Multi Chip Modules to be inserted ***by hand.***

Is socketing high pin count multi chip modules and RISC processors becoming a big concern? Then look to **Nu Horizons**, the semiconductor specialists. As an authorized Mill-Max distributor, **Nu Horizons** has some big ideas on socketing big devices. To learn more about the latest connectors and sockets, including the "Ultra Lite," contact **Nu Horizons** today.

HOW TO USE THE IC MASTER

The 1994 edition of the IC MASTER is arranged in three volumes. Each volume serves a specific purpose to help you find the integrated circuit or related product you need. The table of contents on the preceding page describes what is in each volume. The table of contents for Volume 3 also gives the starting page numbers for advertisers' data pages.

The IC MASTER is a functional work. You know what you need. The MASTER helps you find it.

Here are typical problems.

Q. What kinds of functions does the MASTER cover?
A. Turn to page 10 in Volume One. Here is a functional index for the devices covered. The page and line numbers refer you to the exact location within a Section in which a particular function appears.

Q. Who makes a 16K x 1 static RAM with an access time of 70 ns or faster? What are my technology choices?
A. Turn to the MEMORY section, in Volume 1. The first page of the section tells you where the listings of your device begin.
Turn to Static RAMs — General Purpose, and browse through the pages until you reach the 16K x 1 listings. Now look through the listings until you find the access time and characteristics you need. Device numbers are shown by manufacturer. The device numbers of advertisers in the 1994 IC MASTER appear in bold face. The page number following the device number is where additional information may be found in Volume Three. At the extreme right you will see line numbers. These are the specific lines where a device appears.

Q. Which microprocessors are listed in the MASTER? How do I find the microprocessor I need?
A. All commercially available microprocessors are listed in the MASTER. Start with the **microprocessor** listing in the **Master Selection Guide Function Index** (starts on page 10). Here you will find CISC, RISC and Microcontrollers listed according to clock rate. Turn to the various pages shown and then to the advertisers' page where more information may be available.

Q. Who makes a Dual, Low Offset Voltage Op Amp?	A. This is a **LINEAR** device. Turn to the LINEAR section in Volume One. The first page of the section shows the starting page for each category. Turn to the page where Dual Units appear. Look down the list for the device you need. Advertisers' devices are listed in bold face. Turn to the page in Volume Three where more information may be available.
Q. I need an IC with Music capability. Which Master Selection Guide should I use?	A. Turn to the **Master Selection Guide Function Index** starting on page 10. Look through the list until you find **Music.** The page numbers for each kind of device are shown.
Q. I am looking for an application note on a specific device. Where can I find out if one is currently available?	A. Pick up Volume Three. Turn to the Application Note Directory. Here you will find application notes arranged by **function**. Find the function involved and turn to the page where the note is listed.
Q. We need a device that meets MIL standards. Where do I look in the MASTER?	A. Turn to the MILITARY section in Volume Three. The first part lists manufacturers and screening levels available. The second part is a functional index. The last two sections provide cross references from commercial to military and military to commercial part numbers.
Q. I know the basic part number is 2502 and that's all I know. Where do I look?	A. Go to the Part Number Index in Volume 2. All prefixes and suffixes have been stripped away. Turn to the page where 2502 appears. All manufacturers with that base number appear in order along with the full part number and the page and line number where the device is described.
Q. How many manufacturers claim to make a pin-for-pin and function-for-function equivalent to a Motorola MC68000?	A. Turn to the Alternate Source Directory in the back of Volume Two. Turn to Motorola's listings. Those manufacturers who claim to have equivalent parts are listed in order. If you have an IBM or compatible computer with a hard drive, you can get the 1994 IC MASTER **Alternate Source Directory** on a disk. This disk provides the complete list of alternate sources and allows you to add your own part numbers, as well as notes such as prices or sources. Call Hearst (516) 227-1300 and ask for Book Sales for further information.

Q. I looked in the Alternate Source Directory. The part I want an alternate source for isn't listed. Why not?	A. Are you sure you looked through the entire listing for the original manufacturer? Some devices may be listed in odd ways depending on how the MASTER's editors receive the information. Then there is the probability that no other manufacturer makes an exact replacement for your part. It is important for you to understand how the Alternate Source Directory is compiled. Manufacturers supply the information that **their** part is an exact replacement for **another** part. The original manufacturer does **not** tell us his part can be replaced by those listed.
Q. What do the manufacturers' part numbers mean? I have a Philips NE592N. What do all the letters and numbers mean?	A. Look in Volume Two for the Part Number Guide. Turn to the Philips portion. Now you know the **N** prefix means, zero to plus seventy degrees Centigrade. The **N** suffix indicates the package style. The numbers and letters in the middle are the device type. Each manufacturer has a different code system. Understanding the systems is a great help in comparing devices.
Q. Where can I find the addresses and telephone numbers of manufacturers, local sales offices and distributors?	A. Pick up Volume Three. Turn to the Manufacturers and Distributors Directory. Within each manufacturer, sales offices and distributors are listed alphabetically by state.
Q. I just saw a new device advertised in Electronic Products magazine. It isn't listed in the MASTER. Why not? When will it be listed?	A. Preparing the information for the annual IC MASTER is a tremendous undertaking. It requires the cooperation of every single manufacturer. All of the material must be organized, cross referenced and placed in the data base. This data base must be closed off in November in order to meet the publishing date of late January. That is why some devices are not listed. They came on the market too late for the deadline. There are two updates to the annual MASTER. They are called the **IC MASTER UPDATE**. One is issued in the late Spring and the other in the early Fall. Be sure to sign up for copies when you get your new IC MASTER. If you are not sure whether or not you have requested the updates, please write to the Circulation Department at the address shown on page 2 of this MASTER. Be sure to indicate which edition of the MASTER you are using.

IC MASTER EDITORIAL ADVISORY BOARD

We are indebted to the following companies and individuals who have agreed to serve on the 1993-94 Editorial Advisory Board:

Analog Microsystems	**David Hage** *Director, Marketing Planning and Services*
Analog Devices	**Dan Sheingold** *Technical Marketing Manager*
Datel	**Bob Leonard** *Product Line Manager—Hybrids*
ECI Semiconductor	**Troy Speers** *Product Line Manager*
Electronic Designs Inc.	**Paul Marien** *Product Marketing Manager*
Fujitsu Microelectronics	**Charles Glenn** *Products Communications Manager*
Future Electronics	**Bob Desmarais** *Training Lab*
Harris Semiconductor	**Brian Alaskiewicz** *Manager, Marketing Communications*
Hitachi America	**Ken Pope** *Product Marketing Manager*
ILC Data Device Corporation	**Mike Glass** *Applications Manager*
The Krueger Company	**Myron Lieberman** *Technical Director*
Linfinity Microelectronics	**Mark Granahan** *VP Marketing*
LSI Computer Systems	**Al Kaplan** *Vice President and Senior Engineer*
Micro Networks Inc.	**Jeff Rees** *Design Engineer*
Mitsubishi Electronics	**Chris Peterson** *Marketing Manager*
Motorola Semiconductor	**Jasper Norris** *Manager, Strategic Programs*
National Semiconductor	**Richard Sessions** *Dir. of Mktg, Int. Systems Group*
NCR Microelectronics	**Jim Patella** *Marketing Manager, Semicustom Products*
NEC Electronics	**Dan Domingo** *Corporate Strategic Marketing Manager*
Philips	**Sharon Long** *Director of Marketing*
Sanyo	**Tsuyoshi Taira** *Chairman of the Board*
Sharp Electronics	**Robert Bernardi** *Director, Integrated Circuits and Semiconductors, Microelectronics Group*
Siemens	**Dave Sealer** *Vice President, Marketing*
Toshiba	**Satchit Dokras** *Manager of Strategic Planning*
VLSI Technology	**Jim Farrell** *Technical Services Manager*
Xicor	**Rick Orlando** *VP of Strategic Marketing and Corporate Applications*

PART NUMBER GUIDE

Each IC Manufacturer has his own special method of identifying products, usually through a system of logos, device number prefixes and suffixes. This Part Number Guide is arranged alphabetically by manufacturer and describes each company's part number system. JAN nomenclature is also covered.

Manufacturer Device Identification	Part Number Prefix	Part Number Suffix

ACTEL

Actel

Package

PG	Ceramic Pin Grid Array

Temperature Range

C	Commercial 0°C to 70°C
I	Industrial –40°C to 85°C
M	Military –55°C to 125°C
B	883B

Prefix	Device	Suffix
A	1280	-1 PG 176 C

Die Revision (Future)
Speed — -1
Package — PG
Number of Pins — 176
Application — C

ADVANCED ANALOG

Advanced Analog
a division of Intech

Temperature Range

J	0°C to 70°C
K	0°C to 70°C
S	–55°C to 125°C
T	–55°C to 125°C

Prefix	Device	Suffix
DAC	390	XD/B

Temperature Range — XD
Military Screening — /B

Manufacturer Device Identification | **Part Number: Prefix** | **Suffix**

INTEL

Description
- **M** Indicates Military Operating Temperature Range
- **I** Indicates Industrial Grade
- **J** Indicates a JAN qualified device, but is for internal identification purposes only. All JAN devices must be ordered by M38510 part number (Example: M38510/42001 BQB), and will be marked in accordance with MIL-M-38510 specifications.

- **P** Plastic Package
- **R** Hermetic Package, Leadless Chip Carrier
- **X** Unpackaged Device

Examples:

D2147H1	High Speed 4096x1-Bit Static Ram (35ns, 180/30mA)
C8080A2	8080A Microprocessor with 1.5 s cycle time, hermetic package Type C, commercial temperature range
MD8080A/B	8080A Microprocessor, hermetic package Type D, military temperature range, MIL–STD 883 Level B processing*

* On military devices, B suffix indicates MIL–STD 883 Level B processing.

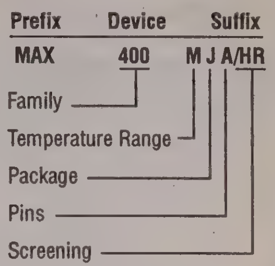
4 Letter Suffixes

The first letter of the suffix is used to denote product grade, for example, MAX631ACPA means 5% output accuracy (A), the remaining 3 letters denote temperature range, package type and number of leads.



NOTE: Alternate source devices follow original manufacturers part number and masking system.

SN	Digital (2nd Source)
TP	Telecom Products
TMP	Terminal Management Processor

Temperature Ranges
Linear Devices
With proprietary linear circuits, a 1-2-3 numbering system is employed.
The 1 denotes a Military temperature range device (–55°C to 125°C), the 2 denotes an Industrial device (–25°C to 85°C), and the 3 denotes a Commercial device (0°C to 70°C). i.e. LM101/LM201/LM301. Exception to this are the LM1800 Series; some hybrid circuits which employ a "C" Suffix; and second source products which follow the original manufacturer's numbering system.

Package

D	Glass/Metal DIP
E	Ceramic Leadless Chip Carrier (LCC)
F	Glass/Metal Flat Pack (1/4" x 1/4")
G	12 Lead TO-8 M/C
H	Multi-Lead M/C
H-05	4 Lead M/C (TO-5) } Shipped with Thermal Shield
H-46	4 Lead M/C (TO-46) } Shipped with Thermal Shield
J	Lo-Temp Ceramic DIP (Sometimes referred to as the "Fit-Seal" Package).
J-8	8 Lead Ceramic DIP ("MiniDIP")
J-14	14 Lead Ceramic DIP (-14 used only when product is also available in -8 pkg.).
K	TO-3 M/C in Steel, except LM309K which is shipped in Aluminum
KC	TO-3 M/C (Aluminum)
K-Steel	TO-3 M/C (Steel)
M	Small Outline Package
N	Molded DIP (Epoxy B)
N-01	Molded DIP (Epoxy B) with Staggered Leads
N-8	8 Molded DIP (Epoxy B) ("Mini-DIP")
N-14	14 Lead Molded DIP (Epoxy B) (-14 used only when product is also available in -8 pkg).
P	3 Lead TO-202 PWR Pkg
Q	Cerdip with UV Window
T	3, 5, 11, 15 & 23 Lead TO-220 PWR Pkg (Epoxy B)
V	Multi-Lead Plastic Chip Carrier (PCC)
W	Lo-Temp Ceramic Flat Pak
WM	Wide Body Small Outline Package

Directory of
IC Manufacturers
Data Pages

IC MASTER

THE FAST AND EASY WAY TO FIND IC MANUFACTURERS' DATA BOOKS!

The 1994 DIRECTORY OF IC MANUFACTURERS' DATA PAGES is a unique index designed to save you time and help you find the manufacturers' precise data book or sheet that you need on any integrated circuit listed in the 1994 IC Master.

Simply look up any IC by base number. The cross-reference will show you the manufacturer's complete device number together with the name and issue date of the applicable manufacturers' data book.

For example: If you wanted the complete manufacturers' data on device number ADOP07. Look up base number 07. Following the base number is the manufacturer's name...Analog Devices, the complete device number ADOP07 and the page number of where the device is described in the IC Master. The listing will then show you that the manufacturer's data book is Analog Devices "Linear Products DataBook" .

Now you can contact Analog Devices by phone or FAX and request the EXACT data book you need. No wasted words, no wasted time.

Plus, where and whom to call for technical information, at any IC manufacturer, is at your fingertips in the complete Manufacturers & Distributors Directory.

A guaranteed time saver, this unique directory is a must for every engineering department!

Don't waste another precious engineering minute.

ORDER THE 1994 DIRECTORY OF IC MANUFACTURERS' DATA PAGES...TODAY!

To order your 1994 Directory of IC Manufacturers' Data Pages,
Contact your local IC MASTER distributor or,
send your purchase order and check for $84.50 plus tax* to:

Marie Botta
Hearst Business Publishing
645 Stewart Avenue Garden City, NY 11530
(516) 227-1314 • FAX (516) 227-1453

*Please add sales tax in NY,MA,IL, CA, or GST tax in Canada
For delivery outside the USA, please add $20 per directory.

For faster service, have your VISA or
MasterCard handy, and call our
CREDIT CARD HOTLINE: 1-800-833-7138

PART NUMBER INDEX

This Index shows the page and line where each device appears in the Master Selection Guide.

The Index is arranged in alphanumeric sequence, ignoring the manufacturers' prefixes and suffixes and using the basic part numbers.

The numbers are sequenced by reading the digits from left to right, assuming that letters come before numbers. (As an example, these numbers would appear in the following order: 5301, 531, 54LS01, 54139, 555.)

After each base number, manufacturers' names and full part numbers are listed. This arrangement allows you to find a device whether or not you know the name of the manufacturer or the manufacturer's prefixes. The page references in **BOLD FACE** lead to manufacturers' data pages in Volume Three.

This is an Index of all parts with identical basic part numbers, regardless of their function. **It is not an Alternate Source Directory.**
